Memo to File

November 30, 1960

From Hollaender

His first approaches over the phone to Randt have not been too encouraging with respect to Oak Ridge participation. Evidently de Busch has been very well supported and it would be the cause of some embarrassment if his work were not enthusiastically received. Hollaender has an appointment to see Randt in Washington on Friday and was interested in some background information. I urged him to continue his interest and stressed the importance of the problem was more than enough to make up for the difficulties and irritation.

*J. Randt*
